

RAILROAD PAINT
AND
COLOR REFERENCE

Compiled by:
Eric Schlentner
Big E Productions, LLC

The following data has been compiled from many sources including online, user submissions and direct inquiry. This information has been edited, corrected and compiled into the reference list that follows.

Currently, the list is divided into the following sections:

- Diesel & Passenger Cars
- Pullman Company
- Steam
- Freight Cars
- Structures

More sections will be added as necessary.

Where information is available, interior colors are included.

We encourage all users of this list to submit corrections if needed as well as new information on current formulations and colors to be added to the list. Including provenance is especially appreciated, almost mandatory. We can be contacted through our website contact page at:

<http://www.bigeprod.com/contact.php>

Other Contact Information:

Big E Productions, LLC
PO Box 19176
New Franklin, OH 44319
(234) 542-7754

Please note that this list is formatted to print on 8-1/2" X 14" legal size paper.

Disclaimer: The list is "Use at your own risk", not everything has been verified. This is also a "living" document subject to change without notice.

Notes:

E.I. du Pont de Nemours & Co. Prefixes and Suffixes

DuPont was the preeminent paint and coatings supplier to the railroad industry. We're slowly building a list of DuPont prefixes and suffixes to help decipher the older product lines. We'll add more as we learn more. Additions and corrections would be welcome.

Original DuPont Products:

Duco - nitrocellulose lacquer

Dulux - alkyd enamel

Lucite - acrylic lacquer

Centari - acrylic enamel

Imron - polyurethane

Note: In most cases, the same color number could be used with the different product lines.

Common Prefixes:

Duco: 202, 241, 243, 246, 254, 259

Brushable Dulux: 83, 88, 93

Spray-only Dulux: 166, 234

Primer: 63

Interior Color: 68

Lucite: 890

Later DuPont Codes, no Prefix, suffix denotes:

A=Centari

D=Dulux

L=Cronar

U=Imron

Current Applicability of Historic DuPont Codes

DuPont started changing their product line in the '90s. The higher VOC and heavy metal pigment products were discontinued and were replaced by new formulations with a new coding system that did not correlate to the old system. In 2014 DuPont sold their industrial coatings division to Axalta. Axalta has their own code system. The only way reliable to get a color match to historic DuPont colors is to send a color sample to your supplier for scanning.

Ditzler and PPG Codes:

The old color codes are still valid and can be used by the PPG Industrial Coatings lab to make current formulations. Be aware that the sheen would likely be different which may affect the color's appearance in varying light. They'll work to get as close of a color match as possible. These differences are due to current VOC requirements and the lack of heavy metal pigments. It's best to also send a sample if you have one.

Other Manufacturers' Codes:

We've not yet investigated on whether other manufacturers' codes are still valid. If you have any information on the validity of other codes, please feel free to contact us and let us know.

Pantone Colors:

Pantone is a standard color ink matching system for printing, not for paint color formulation. Ink and paint standards do not cross as they are different systems for different processes. However, if you want your paint to match a specific Pantone color card, send the card to the coatings manufacturer's lab to have it scanned and formulated. Where we do have a match to a specific Pantone color, the Pantone color number is provided.

Munsell Color System:

Munsell is an international color defining standard based on Hue (color), Value (light or dark), and Chroma (intensity). When available, we've added Munsell notation. These can be used by your supplier to determine the color.

Credits:

Where large amounts of data have been supplied and confirmed by others, "footnote" numbers have been added to provide credit where credit is due.

- ¹ Data supplied and confirmed by Dennis Storzek
- ² Data supplied and confirmed by Fred Heilich
- ³ Data supplied and confirmed by Eric Schlentner,
- ⁴ Data supplied and confirmed by Bob Webber, Pullman Library
- ⁵ Data supplied and confirmed by Alan Maples, Everett Railroad

Susan Yosten has provided a large amount of PRR color data by PRR account reference numbers some of which have been included here. The bulk of the remainder will be added if we can find the reference numbers and what they define.

Revisions:

- 05/22/18: Initial release
- 05/26/18: Revised/added codes for AA, MLS, WAB; added footnotes for confirmed contributions; general revisions; split list into Diesel/Passenger, Steam and Freight/MOW.
- 05/30/18: Moved Soo blue and green to freight cars as Colormark.
- 06/11/18: Added 1947 GN Empire Builder; 1956 SP&S GP9; WAB/BO Blue Imron; BO/NKP Gold.
- 06/21/18: Added Pullman Co. section for passenger cars, added some P-S freight cars.
- 06/22/18: Added Structure section, PRR Budd FOM scheme, CR loco, freight car & structures, confirmed BM colors & add'l info, confirmed NYC grays.
- 07/04/18: Revised format.
- 10/28/18: Corrected & added PRR passenger, freight and structures. Added SP depot colors.
